The Preferred Security Gate Since 1962

Hybrid Gates

The IEP Hybrid Gate is the strongest most secure gate on the market, making it the preferred solution for businesses and government projects. Designed with a continuous frame on all sides that features twice as much steel as our standard heavy-duty gates, the Hybrid utilizes a combination of vertical bars and traditional scissor style webbing to provide total coverage and maximum security. The fully galvanized, weather-resistant gate can have either mounted permanent or fold-away top and bottom tracks. Every Hybrid is custom built to your specifications to protect openings of any size!
